

**NEW CODE KIT: 2239**  
**V360 BACKWASH REGULATOR KIT**

It consists of two PVC parts, as shown in drawing DA0119 and DA0120, to be applied on the union pipes of V360 top/bottom column (see above mentioned drawings) in order to have the possibility of a regulation of the countercurrent flow speed.

Please note the following:

- For installations please refer carefully to the attached drawings
- The backwash regulator is a flow regulation device and cannot be used as a shut-off system.

Thanks and Best Regards
